

Sprint 4 Report
MyPantry
Sprint End: 3/9

Things to stop doing: We want to stop working on features that will not be able to be completed by the end of the quarter.

Actions to start doing: We want to start communicating more often and doing pair programming so that we can work more efficiently

Actions to keep doing: We want to continue to meet consistently and work on tasks well.

Work Completed/ Not Completed:

Completed user stories:

As a user seeking food assistance, I want to be able to reserve items at a food pantry at a certain time and pick up my order so I have the assurance that I can both get food and get it at a time that works for me.

As a food pantry, I want to be able to get user orders in an organized fashion so that I can efficiently prepare their orders. This should also update our inventory automatically.

Not completed user stories:

As someone seeking food assistance, I want to be able to report if there is a mistake in the information given by the food pantry, so that the food pantry and other users are informed about this mistake.

Work Completion Rate:

User Stories Completed: We were able to complete 2 user stories during this sprint.

Total Number Work Hours: The total number of hours during the prior sprint was around 25 hours, as it took a long time to implement the new features and make sure other features were working properly alongside the new parts.

User Stories/ Day: We were able to complete a user story about once every 7 days.

Work Hours/ Day: We estimate that we worked about 2-3 hours a day.

Ideal: We believe that we worked at a good pace during this sprint, as we increased our work rate. We believe that we should have been working at a better pace earlier in the quarter, as we did not realize how long some things in the end would take us.
