

Sprint 4 Plan

Product: MyPantry

Group: Edward Chan, Kai O'Brien, Meelad Danai, Sydney Repp

Release Date: March 9th, 2021

Sprint 3: Feb 24th To March 9th

Goal: We want to create a method for users to edit their cart and add orders at certain times. We also want users to be able to go through nearby pantries to view inventory. Also need to finish unfinished task of viewing inventory or nearby pantries in an effective way.

Task listing, organized by user story:

- **Placing orders:** As a user seeking food assistance, I want to be able to reserve items at a food pantry at a certain time and pick up my order so I have the assurance that I can both get food and get it at a time that works for me.
- **Receiving orders:** As a food pantry, I want to be able to get user orders in an organized fashion so that I can efficiently prepare their orders. This should also update our inventory automatically.
- **Error reporting:** As someone seeking food assistance, I want to be able to report if there is a mistake in the information given by the food pantry, so that the food pantry and other users are informed about this mistake.

Team roles:

Edward Chan (Scrum Master),

Kai O'Brien (Product Owner),

Meelad Danai (Developer),

Sydney Repp (Product Owner)

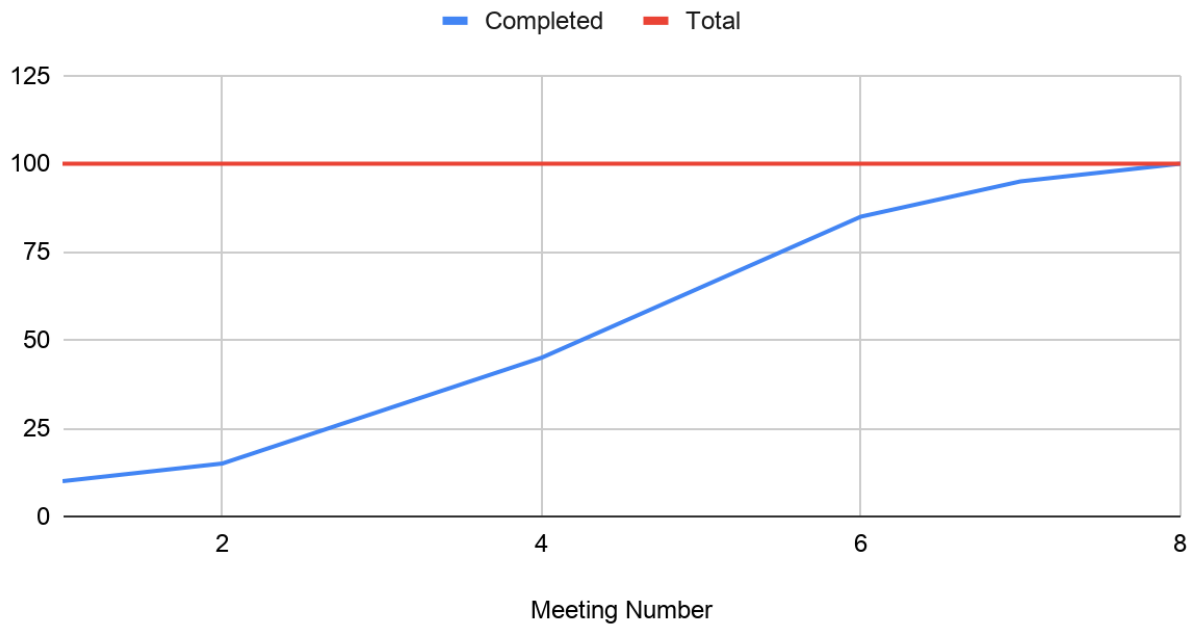

Initial task assignment:

Edward Chan: Work on creating method for users to get inventory from pantry into carts, Work on creating a method for error reporting
