

Sprint 2 Report  
MyPantry  
Sprint End: 2/9

**Things to stop doing:** We want to stop focusing on features that do not help use complete the MVP.

**Actions to start doing:** We want to start working on separate branches and efficiently resolving merges, develop unit tests, and increase communication on discord about any progress.

**Actions to keep doing:** We want to continue to meet consistently.

**Work Completed/ Not Completed:**

Completed user stories:

As a user of MyPantry, I want to be able to sign up and have my information saved, so that I can login later using the same information.

As a food pantry, I want to be able to login using my signup information, so that I can use the MyPantry app as a food pantry owner.

As someone seeking food assistance, I want to be able to login using my signup information, so that I can use the MyPantry app as someone seeking food assistance.

Not completed user stories:

As a food pantry, I want to be able to login using my signup information, so that I can use the MyPantry app as a food pantry owner (with just email/password).

**Work Completion Rate:**

User Stories Completed: We were able to complete 3 user stories during this sprint.

Total Number Work Hours: The total number of hours during the prior sprint was around 18 hours since we had to learn the different technologies to display a map, create an authentication system, and start building an inventory with MongoDB and Express.

User Stories/ Day: We were able to complete a user story about once every 4 days.

Work Hours/ Day: We estimate that we worked about 1-2 hours a day.

Ideal: We believe that our current work rate is adequate enough to meet the MVP. We should be entering a stage where things are being built more quickly because we are more knowledgeable about the technologies we will be using.
