User Stories For Release:

Sprint 1 (47)

As a food pantry or someone seeking food assistance, I want to be able to go to a page that has background information, a signup button, and a login button, so that I can understand the MyPantry app and see ways to sign up or login. (21)

As someone seeking food assistance, I want to be able to sign up as someone that is looking for a food pantry and create a profile with my contact information, so that I can login to the page. (13)

As a food pantry, I want to be able to sign up as a food pantry with contact information and the name of the pantry, so that I can login to the page. (13)

Sprint 2 (55)

As a user of MyPantry, I want to be able to sign up and have my information saved, so that I can login later using the same information. (13)

As a food pantry, I want to be able to login using my signup information, so that I can use the MyPantry app as a food pantry owner. (21)

As someone seeking food assistance, I want to be able to login using my signup information, so that I can use the MyPantry app as someone seeking food assistance. (21)

Sprint 3 (42)

As a food pantry, I want to be able to store information about how much food I have and make this information public, so that other users can see what the food pantry has and other information about it. (21)

As someone seeking food assistance, I want to be able to see food pantries near me and see basic information about the food pantry, so that I can find a food pantry that I want to go to. (21)

Sprint 4 (39)

As someone seeking food assistance, I want to be able to report if there is a mistake in the information given by the food pantry, so that the food pantry and other users are informed about this mistake. (21)

As someone seeking food assistance, I want to be able to confirm another user's report, so that this report has multiple users backing it up. (5)

As a food pantry, I want to be informed when there is a report or problem, so that I can address the problem with the pantry and fix it. (13)

Product Backlog: Create a way for users to confirm the information and keep it up to date (similar to the Waze App)
